Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

H

Office Action Summary	Application No. 10/509,763	Applicant(s) INOUE ET AL.	
	Examiner Peter J. Bertheaud	Art Unit 3746	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 April 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-8 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-8 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 18 April 2007 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
- 1. ☒ Certified copies of the priority documents have been received.
 - 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 - 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. This office action is in response to the amendments filed 4/18/2007. It is noted that claim 3 has been amended and claim 8 has been added.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 2, and 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tuckey 4,789,308 in view of Morii 4,570,093.

Tuckey discloses an electric fuel pump including a yoke comprising a first tubular yoke (see element in between 16 and 20) provided with a ring-shaped magnet 20 on an inner circumference and a second tubular yoke 16 provided on an outer circumference of said first tubular yoke at a position conforming to said magnet. Tuckey does not teach the following claimed limitations taught by Morii.

Morii teaches a DC motor assembly including a yoke 4, a ring-shaped drive magnet 13, and a rotatable shaft 1. Morii further teaches that at least one end face of said yoke 4 and said magnet 13 is on the same plane (see Fig. 6) and that an axial length of said yoke is substantially equal to an axial length of said magnet (see Fig. 6). Morii also teaches that the magnet is formed by injection molding (see col. 5, lines 50-53). It would have been obvious that a magnet, or any item, formed by injection molding

Art Unit: 3746

will have a "gate portion" formed on a particular face of the magnet, depending on how the mold is constructed, after molding is complete. Morii also teaches that the use of rare-earth magnets in similar motors is conventional. Morii teaches that this would be advantageous because the torque generated per unit current is increased, so that the starting characteristics and volumetric efficiency of the motor are improved.

Therefore, it would have been obvious to one skilled in the art at the time of invention to modify the electric fuel pump of Tuckey by matching the physical characteristics of the yoke to that of the magnet as well as using rare-earth magnets in the motor assembly, in order to improve the starting characteristics and volumetric efficiency of the motor (Morii, col. 2, lines 51-58).

Furthermore Tuckey discloses the claimed invention except for the first tubular yoke being 3 mm in thickness. It would have been an obvious matter of design choice to make it 3 mm, since such a modification would have involved a mere change in the size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art. *In re Rose*, 105 USPQ 237 (CCPA 1955) (see MPEP 2144.04, IV. A. – Change in Size/Proportion).

4. Claims 3 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tuckey 4,789,308 in view of Morii 4,570,093, and in further view of Tuckey 4,401,416.

Tuckey 308 in view of Morii disclose the invention as discussed above. However, Tuckey 308 in view of Morii does not teach the following claimed limitations taught by Tuckey 416.

Art Unit: 3746

Tuckey 416 teaches a rotary fuel pump comprising a first tubular yoke 30, a second tubular yoke 40, and a ring shaped magnet 50, 51 (see col. 32, lines 67-68 and col. 3, lines 1-4). Tuckey 416 further teaches that the magnet 50, 51 is provided with a convex portion or protrusion (see portion of 51 that sticks out past end of 50) at an end face thereof, and said convex portion or protrusion engages with a convex portion (see receiving portion of 30 for 51) of the other member fixed to said first tubular yoke or said second tubular yoke.

Therefore, it would have been obvious to one skilled in the art at the time of invention to modify the electric fuel pump of Tuckey 308 in view of Morii by having a convex portion of the magnet received in a concave portion of the yoke in order to securely hold the various components together and to ease assembly of the pump (Tuckey 416, col. 3, lines 4-8).

Allowable Subject Matter

5. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments, see page 7 of the Amendment, filed 4/18/2007, with respect to claim 3 have been fully considered and are persuasive. The rejection of claim 11 under 35 USC § 112, first paragraph, has been withdrawn.

7. Applicant's arguments filed 4/18/2007 for the remaining rejections have been fully considered but they are not persuasive.

8. In reference to arguments to the 35 USC rejection under 103 of claim 1: Examiner maintains that Tuckey 308 anticipates the claimed limitations. There is no reason that the cylindrical case 16 of Tuckey 308 cannot be interpreted as a yoke (specifically the second tubular yoke), mainly due to the fact that in the present application the second tubular yoke 5 is also a cylindrical case. Therefore the rejection of claim 1 under 35 USC § 103(a) is upheld.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Art Unit: 3746

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter J. Bertheaud whose telephone number is (571) 272-3476. The examiner can normally be reached on M-F 9am - 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Stashick can be reached on (571) 272-4561. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
